

Homemade Cat Slow feeder

You will need:

- Lots of Lego bricks
- Some nice treats for your cat—dry biscuits, tiny pieces of ham, etc.
- A Cat

Step 1. Select bricks (make sure they are not too small in case the cat swallows them) and start building a box.

Step 2. Build it as high as you can, at least 10 bricks high.

Step 3. Add some interesting shapes inside so your cat has to work for the treat.

Step 4. Drop in some cat treats and watch your cat have fun!
